

Suhaib Abu-Alhija

QA Engineer | SDET | Test Automation Engineer

+962-799146681 | suhaib.abualhijaa@gmail.com | [linkedin.com/in/suhaib-hija](https://www.linkedin.com/in/suhaib-hija) | [Portfolio](#)

PROFESSIONAL SUMMARY

QA Engineer with a strong Full Stack Development background and hands-on experience in manual test planning, test case design, functional and exploratory testing, test automation, API testing, integration testing, regression, smoke, UAT, accessibility, and release validation for enterprise web applications. Experienced in Playwright, Postman, Newman, REST APIs, CI/CD, Jira, SQL, JavaScript, PHP, Drupal, payment systems, subscription workflows, authentication, data migrations, and third-party integrations. Strong technical background enables effective root-cause analysis across frontend, backend, API, database, and integration layers.

CORE SKILLS

Test Automation: Playwright, Page Object Model, Test Isolation, Runtime Test Data, Storage State, Tag-Based Execution, Flaky Test Debugging

API & Integration: Postman, Newman, REST APIs, Webhooks, Request/Response Validation, Authentication Testing, Error Handling

Manual Testing: Test Planning, Test Case Design, Functional, Exploratory, Regression, Smoke, Integration, UAT, Negative, Boundary, Edge Case, Release Testing

Payments: Stripe, Stripe Payment Element, Worldpay, PayPal, SEPA, 2C2P, PagBrasil PIX, iRaiser, Vipps, Apple Pay, Google Pay, 3DS, Recurring Payments, Refunds

Programming & Tools: JavaScript, PHP, Python, SQL, HTML5, CSS3, Git, Jira, Linux, SSH, JSON, Composer, DDEV, Lando, CI/CD

Accessibility & Process: WCAG 2.1/2.2, Screen Reader Testing, Keyboard Navigation, Agile, Scrum, Defect Lifecycle, Release Coordination

PROFESSIONAL EXPERIENCE

QA Engineer

Vardot | Amman, Jordan | November 2025 - Present

- Own end-to-end QA activities covering requirements analysis, test planning, risk-based manual and automated testing, API validation, defect management, regression, release validation, and UAT support.
- Design and execute 100+ manual test cases across functional, exploratory, regression, smoke, integration, negative, boundary, and edge-case scenarios; maintain requirements traceability and contribute to a management-verified 0.07% UAT bug rate.
- Increased automation coverage from 14% to 67% by developing maintainable Playwright tests using reusable Page Object Model factories, generated test data, authentication state, tagged execution, and full test isolation; improving reliability by eliminating hard-coded waits and diagnosing flaky CI behavior.
- Perform API and integration testing using Postman and Newman, validating authentication, payloads, status codes, error handling, webhooks, data integrity, Salesforce synchronization, CSV imports, and data migrations.
- Test 16+ payment integrations, including Stripe, Worldpay, PayPal, SEPA, 2C2P, PIX, iRaiser, Vipps, Apple Pay, and Google Pay, covering one-time and recurring payments, refunds, 3DS, declines, fraud scenarios, multiple currencies, and gateway failures.
- Validate complete donor and subscription lifecycles, including magic-link authentication, subscription management, payment-method updates, billing recovery, abandoned-cart emails, tax receipts, role-based access, MFA/2FA, geo-redirects, and administrative workflows across local, DEV, STG, and PROD environments.
- Write precise Jira defects with reproducible steps, expected and actual results, evidence, and technical context; collaborate with developers, DevOps, clients, and stakeholders throughout investigation, UAT, and release validation.
- Reduced regression testing cycle time by 35% through automated smoke and regression coverage integrated into CI/CD pipelines, and delivered a two-part internal Playwright training series for QA interns.

Key Projects:

[UNHCR Donation Platform](#), [UNRWA Donation Portal](#), [UNHCR Emergency Handbook](#), [UNHCR.org](#), other enterprise e-commerce and payment platforms.

Full Stack Developer with QA Responsibilities

Vardot | Amman, Jordan | December 2022 - November 2025

- Developed and maintained enterprise applications using Drupal, PHP, JavaScript, SQL, HTML, and CSS.
- Built backend integrations, business logic, cron jobs, complex forms, APIs, and role-based access control systems.
- Progressively took ownership of quality through manual test cases, feature validation, defect reporting, UAT support, and early automation.
- Worked with databases, REST APIs, authentication systems, third-party integrations, and multi-environment deployments.
- Identified and investigated defects across frontend, backend, database, API, and integration layers, using development experience for deeper root-cause analysis.
- Collaborated across Development, QA, DevOps, Design, and Project Management throughout the software development lifecycle.

Web Development Intern

Vardot | Amman, Jordan | August 2022 - December 2022

- Completed hands-on training in HTML, CSS, JavaScript, PHP, Drupal, Git, web servers, deployment workflows, and professional software delivery.

TRAINING & CERTIFICATIONS

- QA Automation with Playwright, Completed
- Postman and Newman API Testing, Completed
- Manual Testing Bootcamp, Completed
- Web Accessibility Testing (WCAG 2.1/2.2), Completed
- ISTQB Certified Tester Foundation Level (CTFL), In Progress

EDUCATION

Bachelor of Science in Civil Engineering

Yarmouk University | Irbid, Jordan | 2014 - 2019
